

dynaMigs.net is a full service provider for automated data migrations in the field of NAS, SAN & Cloud storages. Since 2015 we organise international IT projects for customers worldwide. We realise projects beginning from a detailed analysis, through migration planning, to automated implementation and verification. Furthermore, we offer a change and project management service.

To enhance our team, located in **Gräfelfing near Munich**, we are looking for a:

Developer (m/f/d)

Your profile

- Good Linux scripting skills (Bash, Perl)
- Advantageous: knowledge in the storage domain, especially NAS
- Experience in web and database development (mySQL/MariaDB, MSSQL)
- Good analytical skills as well as strong team and communication skills
- Very good German and English skills

Your responsibilities

- Enhancement of our migration toolkit
- Development of a web-based frontend
- Integration of new features and functions

We offer:

- Positive work atmosphere in an international team
- Flexible working time (flextime, home office possible)
- Continous education possibilities in a growing successful company
- Flat hierarchies and short decision-making processes
- Fair remuneration
- Modern workplace with newest technologies
- Open-ended employment contract
