

## Data Management: Komprise and dynaMigs launch partnership

*dynaMigs will combine Komprise's software for multi-cloud environments with expert service and support*

**Munich, XX February 2021** – dynaMigs and Komprise have closed a partnership agreement for the DACH region. dynaMigs, a leading service provider for data migration, data management and process automation for the mid-market and enterprises, will become reseller for Komprise's industry-first Multi-Cloud Data Management-as-a-Service Platform. dynaMigs will also offer comprehensive services to Komprise users, including consulting services, installation, support and data analysis. This cooperation enables customers to reducing costs by using the right storage for the right data.

As a leading service provider for data migration, data management and process automation, dynaMigs will add Komprise within their own toolset to complete their service portfolio. Proper data management builds the foundation for successful data migrations. Komprise's software analyses data on storage systems and lists an organization's complete existing data. This enables users to transfer cold data to inexpensive storage systems and achieve significant cost reductions. At the same time, the software can help IT service providers in the selection of storage hardware, the planning of migrations and the budgeting of projects. With the help of Komprise, salespeople can easily get the necessary overview of data assets and structure in the pre-sales assessment.

"As data management has become a growth segment for us, we have learned how customers and IT service providers are looking for solutions that help them manage their complex and ever growing data landscape well", said Michael Krett, Managing Director, dynaMigs. "Komprise can help to save up to 70 percent of storage, backup, and cloud costs by migrating data on inexpensive systems without any downtime. We look forward to work even closer with Komprise in the DACH region."

"We are pleased to partner with dynaMigs given their deep expertise and knowledge of storage. We are excited to bring the benefits of global data management to DACH companies to address explosive data growth within tight budgets," says **Clare Loveridge, VP EMEA Sales, Komprise**.

### **About dynaMigs**

dynaMigs is a leading IT service provider that covers the full range of storage services from data migration, data management to process automation for large and medium-sized corporations. dynaMigs, headquartered in Graefelfing near Munich, provides its services worldwide and helps companies to reduce storage costs and to migrate their data from any source to any target.
